In this leaflet:
1. What Fucibet® is and what it is used for
2. Before you use Fucibet®
3. How to use Fucibet®
4. Possible side effects
5. How to store Fucibet®
6. Further information

1. WHAT FUCIBET® IS AND WHAT IT IS USED FOR

Fucibet® contains two different types of medicine. One medicine is called fusidic acid. It is a type of antibiotic. The other medicine is called betamethasone valerate. It is a type of corticosteroid (steroid). These two medicines work at the same time in different ways.

Fucibet® works by:
- The antibiotic killing germs (bacteria) that cause infections.
- The corticosteroid reducing any swelling, redness or itchiness of your skin.

Fucibet® is used to treat:
- Conditions where the skin is inflamed (eczema or dermatitis) and also infected by germs (bacteria).
- The corticosteroid reducing any swelling, redness or itchiness of your skin.
- The antibiotic killing germs (bacteria) that cause infections.

2. BEFORE YOU USE FUCIBET®

Do not use Fucibet®:
- If you are allergic (hypersensitive) to any of the other ingredients in section 6 of this leaflet.
- If you are allergic (hypersensitive) to any of the ingredients in your medicine. You can find a list of these ingredients in section 6 of this leaflet.
- If you have any of the side effects listed in section 4 that may affect your ability to drive or use machines.

Special care with Fucibet®:
- If you are allergic (hypersensitive) to any of the other ingredients in your medicine. You can find a list of these ingredients in the leaflet.
- If you are allergic (hypersensitive) to any of the ingredients in your medicine. You can find a list of these ingredients in section 6 of this leaflet.
- If you have any of the side effects listed in section 4 that may affect your ability to drive or use machines.

Taking special care with Fucibet®:
- If you are allergic (hypersensitive) to any of the other ingredients in your medicine. You can find a list of these ingredients in section 6 of this leaflet.
- If you have any of the side effects listed in section 4 that may affect your ability to drive or use machines.

Taking other medicines
Please tell your doctor or pharmacist if you are taking, or have recently taken any other medicines. This includes any medicines which you have bought without a prescription.

Pregnancy and breast-feeding
Please ask your doctor or pharmacist for advice before using Fucibet®.

Please read all of this leaflet carefully before you start taking this medicine.

• Keep this leaflet. You may need to read it again.
• If you have any further questions, ask your doctor or pharmacist.

This medicine has been prescribed for you. Do not pass it on to others. It may harm them, even if their symptoms are the same as yours.

• If any of the side effects become serious, or you notice any side effects not listed in this leaflet please tell your doctor or pharmacist.

• In this leaflet Fucibet® Cream will be called Fucibet®.

2. Before you use Fucibet®

Unless your doctor has told you to, you must not use Fucibet®.

You must not use the medicine for a long time on your face.

If you use the cream over a long time or in large amounts it may make the chance of getting any side effects higher. Also your skin may get more sensitive to this medicine.

Take special care with Fucibet®

- If you are allergic (hypersensitive) to any of the other ingredients in your medicine. You can find a list of these ingredients in section 6 of this leaflet.
- If you have any of the side effects listed in section 4 that may affect your ability to drive or use machines.

Special care with Fucibet®:

- If you have any of the side effects listed in section 4 that may affect your ability to drive or use machines.

Taking other medicines
Please tell your doctor or pharmacist if you are taking, or have recently taken any other medicines. This includes any medicines which you have bought without a prescription.

Pregnancy and breast-feeding
Please ask your doctor or pharmacist for advice before using Fucibet®.

• If you are pregnant, or think you are pregnant. You must not use your medicine for a long time or in large amounts. You must ask your doctor for advice.
• If you are breast-feeding.

Tell your doctor if you become pregnant while using this medicine.

Driving and using machines

Usually your medicine will have very little effect on your ability to drive or use machines. Check with your doctor if you think this medicine may affect your ability to drive or use machines.

Important information about some of the ingredients of Fucibet®

Fucibet® contains:
- Cetostearyl alcohol. This may give you an itchy rash and inflammation on your skin where your medicine is used.
- Chlorocresol. This is a preservative. It may give you an allergic reaction. Please read section 4 so you can spot any signs that this may be happening to you.

Please ask your doctor if you are worried about any of the ingredients in this medicine.

3. HOW TO USE FUCIBET®

Always use Fucibet® exactly as your doctor has told you. You should check with your doctor or pharmacist if you are not sure.

How to put on Fucibet®

- This medicine is only for using on your skin or the skin of a child. Do not swallow it. Do not put it inside your body.
- Remove the cap. Check the seal is not broken before you first use the cream. Then push the spike in the cap through the seal on the tube.
- Always wash your hands before using Fucibet®. Rub the medicine gently on the skin. If you use it on your face be careful to avoid your eyes.
- Unless you are using the cream to treat your hands, always wash your hands after using Fucibet®.
- If you accidentally get any medicine in your eye, wash it out with cold water straight away. Then bathe your eye with eyewash if possible. Your eye may sting. If you start to have any problems with your sight or your eye is sore, contact your doctor immediately.

How much Fucibet® to use

Your doctor will tell you how much Fucibet® to use.

The usual treatment time is up to two weeks. Ask your doctor before using this medicine for any longer.

You should notice your skin improve after just a few days of using the cream. If there is no improvement after 7 days you should stop using the cream and go back to your doctor.

Usually you should use this medicine twice each day. Use it in the morning and evening. To remind you to use the medicine it may help to use it when you do another regular action, such as brushing your teeth.

If you have been told to cover the skin with any dressings or bandages you may not need to use the medicine so often. A napkin on a baby may act as a dressing. Follow the advice of your doctor.
**4. POSSIBLE SIDE EFFECTS**

Like all medicines, Fucibet® can cause side effects, although not everybody gets them.

Important side effects to look out for:
- You have difficulty breathing
- Your face or throat swell
- Your skin develops a severe rash.

Other possible side effects:
Any of the problems listed below are more likely if the medicine is used for a long time, in large amounts or on skin folds (such as armpits or under breasts).

These problems are more likely in babies and children. They are also more likely if the skin is covered with a dressing, bandage or nappy.

**Skin problems**

- Itchy rash and skin inflammation in the area where the medicine is used.
- Rash
- Small veins near the surface of the skin become visible.

Some side effects are known to be caused by betamethasone valerate (steroid), one of the ingredients in Fucibet® Cream. You should tell your doctor if any of the side effects occur:
- Thinning of the skin
- Stretch marks
- Inflammation or swelling of the hair root (folliculitis)
- Changes in growth of your body hair
- Red spotty rash around the mouth or chin
- Lightening of your skin colour
- Glaucoma
- Adrenal glands may stop working properly. Signs are tiredness, depression and anxiety.

If any of the side effects become serious or you notice any side effects not listed in this leaflet, tell your doctor or pharmacist.

5. HOW TO STORE FUCIBET®

- Keep out of the reach and the sight of children.
- Do not use Fucibet® after the expiry date on the carton.
- Keep out of the reach and the sight of children.
- Do not store above 30°C.
- Do not keep the tube for 3 months after you first open it. Make a note of the date you first opened the tube in the space provided on the carton.
- Do not store the medicine above 30°C.
- Medicines should not be thrown away in waste water or in household waste. Please ask your pharmacist how to throw away any medicine you do not need any more. If you do this you will help protect the environment.

6. FURTHER INFORMATION
